

3.11.20 @ 12:30^{PM}-4:00^{PM} DATASET DIVERSITY

Are you interested in using large national datasets to conduct research with diverse populations?

Many funding agencies are supporting initiatives related to studying health disparities using existing data. This workshop provides an overview of datasets from national studies that have diversity-linked healthcare research in Hispanic/Latino, African American, Native American, and/or Sexual/Gender Minorities samples. Information on how to access, analyze, and report on these population data sets will be provided, with a goal that attendees interested in doing a study with these datasets will acquire adequate expertise to start the process. Content is relevant for attendees at all career levels. Link for speaker bios [here](#).

Visit www.psychosomatic.org for more information.

USE OF NATIONAL DATASETS TO CONDUCT RESEARCH WITH RACE, GENDER, & SEXUAL MINORITIES
