

Roundtable - Navigating the academy – Early Career Researcher

In 2020/2021 we ratified the Herbert Weiner Early Career Award nomination process to increase diversity in applicants and create a more equitable system. As part of that ratification, we have held a roundtable at subsequent meetings (2022, 2023), attended by the Herbert Weiner winner to discuss how their experience in navigating academia. It serves as an opportunity to engage early career researchers and provide mentorship on how to become more engaged in APS as well as receive advice about how to be "successful" in academia more generally.
